

Testplan:

Have the testing subject add a contact with appropriate fields. Each time he tries to add, have him input incorrect number and email and see the appropriate guidance message. Then, have the user try to update a selected contact. If the new updated information is in the wrong format, again, display the correct guidance message.

REPORTED BUGS/ MISSING FEATURES:

- There is a bug when trying to delete entries
- Don't have vcard functionality
- Don't have profile picture functionality
- Can't open url link
